ABOUT ME

I'm a very social guy soon finishing my final year of Engineering in Media Technology at KTH, doing my Master thesis about Chat bot interfaces at Cybercom Group. My greatest interests lie in web development, either building something from scratch or developing new features to existing projects. I call myself a full-stack engineer with front-end focus and a UX interest. I dream of contributing to the web community and become a great web developer. Not only helping myself and the company I work for but giving value to all of the web developers out there. When i get to choose tools to work with i choose React and Node for front-end respectively back-end.

WORK EXPERIENCES

2019 - Present	Cybercome group - <i>Master Thesis Student</i> Doing my master thesis about helpful chat bots as an internal tool for companies to answer FAQs. How to integrate a modern chat bot user interface into an existing intranet.
